

ZYAD EL FAZAZI

Data analyst | Power BI, Automation & Applied AI

zyadelfazazi45@gmail.com | + 33 7 63 75 51 91 | <https://www.linkedin.com/in/zyad-el-fazazi-4b3121267>

Data analyst apprentice at Ingenico (PMO), pursuing a dual degree at Polytech Marseille / IAE Aix. Specialized in data pipelines, automated Power BI dashboards, and generative AI (prompt engineering) to accelerate analysis and decision-making. I am seeking a full-time position starting October 2026 in a Data / Business analysis / AI-oriented role I also built an AI-powered interactive CV for a more dynamic way to explore my profile : [Here](#)

EXPERIENCE & PROJECTS

Data analyst apprentice

Nov 2025 – Present

Ingenico – Valence

- Design and deployment of 7+ Power BI dashboards covering all PMO teams (certifications, budgets, timelines, KPIs)
- Automation of monthly cost reporting via Power Automate
- Development of an AI solution for automatic extraction of supplier names from invoices using Power BI MCP + Claude (GitHub Copilot)
- Integration of Python visuals in Power BI for advanced analytics (clustering, custom visualizations) beyond native tool capabilities
- Implementation of a full ETL pipeline (Power Query, multi-supplier consolidation) to ensure offshore data reliability and feed decision-support dashboards

Tools: Power BI (DAX, Power Query), Power Automate, Python, Power BI MCP, Claude, GitHub Copilot, SharePoint

Internship – Research engineering assistant

May 2025 – Aug 2025

Federal University of Rio De Janeiro - Brazil

- Investigation of biases and legal frameworks surrounding **facial recognition AI algorithms** — analysis of their functioning and algorithmic fairness
- Design and coordination of a **field survey** (protocol, workshops, data collection) and qualitative/quantitative analysis of results
- Development of **centralized tracking tools** to visualize survey progress and facilitate reporting

Tools: Excel, Otter.ai

Academic Project – Survival prediction (Titanic)

May 2024 – Jun 2024

Polytech Marseille

- Built a **classification model (Decision Tree) and clustering (K-Means)** in Python (Jupyter, pandas, scikit-learn) to predict passenger survival based on demographic variables

Tools: Python, Jupyter, Googlecolab, Pandas, Kaggle

SKILLS

Data & Programming: SQL, Python (Pandas), Excel (TCD, Power Query), Power BI, Bitbucket

Cloud & AI: Databricks, Azure, Google Cloud Platform, Generative AI; Tasks automation, prompt engineering

Industrial methods & tools: Lean, 5S, Kaizen, AMDEC, VSM, PDCA, Ishikawa, JIRA

Soft skills: Autonomous, Interpersonal skills, Quick learner, Proactive

EDUCATION

MSc2 – MBA General Management

Sep 2025 – Present

IAE – Aix en Provence

Industrial & Computer engineering degree

Sep 2023 – Present

Polytech – Marseille
